There were no indications that a general change in the organization of Soviet army units in East Germany, Austria or Hungary had occurred during November 1952. Nor were there any major changes discernible in the quartering of troops after the summer training. A conclusive analysis of a possible increase in the number of Soviet units in East Germany cannot be made until the personnel exchange program which started in mid-September 1952 is completed. It appears that the increase in the personnel strength has been insignificant. Intensive training of the new recruits started at all military posts in November 1952 after the winter quarters had been prepared.

Several units of Armeegruppe Nord of the VP moved from tent camps in the TOROLOW-EGGESIN area to winter quarters in various military posts in East Germany at the end of October 1942. This transfer was necessary as the barracks installations under construction in the TOROLOW-EGGESIN area were not completed in time.

Change of quarters.

D. The following changes regarding stations have been discernible:

- a. Following the transfer of artillery units from the barracks installation in POTSDAM-GOLM to the Ludendorff Kaserne and Hohen-

25X1

SECRET

25X1

25X1

25X1 lone Kaserne, the components of the 31st Arty Div [] in POTS-
 25X1 DAM are quartered as follows: division headquarters, [] 25X1
 25X1 and unidentified gun artillery brigade, [] in the southern
 section of the Delius Kaserne; 30th Gds Gun Arty Brig, []
 in the northern section of the Delius Kaserne; and the 1st Gun
 Arty Brig [] in the Ludendorff and Eichenlohe Kaserne.

25X1 b. The transfer to ALTEGEBERG from the Kraftfahrer Kaserne, RATHENOW,
 of the 10th How Arty Brig [] of the 6th Arty Div, as well as the
 transfer to the vacated quarters in RATHENOW from Camp PERINITZ
 of the 25th RL Brig were confirmed. Camp PERINITZ was occupied
 by VP units.

25X1 c. []
 the 14th Gds Tank Regt of the 11th Gds Tank Div which had been
 quartered in BAUTZEN until the beginning of August 1952 is now
 stationed in the Nachrichtenschule in KOBLENZ.

d. An engineer unit, presumably the 134th Gds Engr Bn of the 11th Gds
 Tank Div in DRESDEN, moved from the barracks installation in
 UEBIGAU into the Wilder Mann SS Kaserne on Moritzburger Landstrasse
 in October 1952.

25X1 e. In MUEHLHAUSEN, the barracks installation along the road to GOTTMA
 25X1 and the so-called Haldschloesschen were occupied to capacity []
 [] The motor vehicles belong to army
 troops of the 14th Gds Army.

25X1 f. []
 The
 most recent information tended to indicate that the 597th Itz Rifle
 Regt of the 207th Itz Rifle Div moved from the Tauentzien Kaserne,
 STERNA, to MUEHLHAUSEN where it is to be employed for border guard
 duty.

25X1 g. The assumption that the 953d AAA Bn [] of the 207th Itz Rifle Div
 25X1 was transferred to the Fallschirmjaeger Lager in STERNA proved
 25X1 incorrect. [] the installation
 quarters an air force AAA unit, while the 953d AAA Bn [] is still
 in TANNENHUT.

h. Barracks installations are under construction along the road from
 RAVENSBUECK to LICHEN, 7.5 km west of LICHEN. A tent camp was
 erected nearby and occupied by troops in mid-November 1952. As the
 new station of the 33d Gds Itz Rifle Regt of the 9th Gds Tank Div
 which left PACHWALK in July 1952 have not been determined there is
 the possibility that these installations may be scheduled to
 quarter this regiment.

Organization.

25X1

4. []
 [] one army
 artillery brigade and one army AT artillery brigade are subordinate
 directly to a motorized rifle army and a mixed corps artillery brigade
 to a motorized rifle corps. The TO & E of the individual brigades
 may be carried as follows:

SECRET

25X1

0300000

25X1

Army Artillery Brigade.

1 AT artillery battalion with 12 x 76-mm field guns) Possibly, only
 1 AT artillery battalion with 12 x 100-mm AT guns) one mixed
 1 gun artillery battalion with 12 x 122-mm guns) battalion
 1 howitzer artillery battalion with 12 x 152-mm howitzers) (or two battalions
 1 AAA battery with 6 x 37-mm AA guns) with 12 x 152-mm
 gun howitzers
 each)
 Total strength: 1,300 to 1,400 men

Army AT Artillery Brigade.

2 AT artillery regiments with 24 x 76-mm field guns each (some units may also have some 57-mm AT guns)

1 AT artillery regiment with 24 x 100-mm AT guns

1 AAA battery with 6 x 37-mm AAA guns

Total strength: 1,500 to 1,600 men

Mixed Corps Artillery Brigade.

- 1 AF artillery regiment with 24 x 76-mm field guns
- 1 AF artillery regiment with 24 x 100-mm AT guns
- 1 howitzer artillery regiment consisting of either 2 battalions with a total of 24 x 122-mm howitzers or 1 battalion with 12 x 122-mm howitzers and 1 battalion with 12 x 152-mm gun howitzers
- 1 AAA battery with 6 x 37-mm AA guns

Total strength: 1,600 to 1,700 men.

The brigades are located as follows:

Eighth Cds Army Area.

43d (Gds) Army Arty Bnig: Barracks installation on the west side of Leipziger Strasse in ALT LEUBUERG.

38th Army AT Arty Brig: Barracks installation on the east side of
Leipziger Strasse in ALTEUDUNG.

25X1 308th Arty Brig [] of
the XXVIII Sds Itz Rifle
Corps:

Neuss Kaserne in GLEBA.

25X1 76th Arty Brig [] of
the XXIX Gds Mtz Rifle
Corps:

Flak Kaserne in MERCEBURG.

~~SECRET~~

25X1

SECRET

25X1

6

Third Shock Army Area.

14th Army Arty Brig: Nordlager in ALTEHAGADON.

25X1

20th Army AT Brig: Flak Kaserne in BRANDENBURG.

25X1

20th Ods Arty Brig []
 of the IX Mtz Rifle Corps: Moltke Kaserne and Krueger Kaserne in
 SCHLERNIN.

25X1

304th Arty Brig [] of
 the LXXIX Mtz Rifle Corps: Artillery Kaserne in BURG.

25X1

On the basis of the above assignment of brigades to armies and corps
 [] it must be assumed that the
 3d Gds AT Arty Brig of the Third Shock Army which moved from ALTEH-
 GADON to ROSTOCK in May 1952 is no longer assigned to the Third Shock
 Army but is now subordinate directly to the IV Arty Corps. The IV Arty
 Corps is thus organized into two artillery divisions, three AAA divisions
 and two AT artillery brigades.

5.

25X1

Training.

6. Individual training of the new recruits from the U.S.S.R. started at all military posts in November 1952, after the return from the troop training grounds and completion of the final maneuvers in September and October and after the preparation of quarters.

Personnel.

7. The arrival in East Germany of recruits from the U.S.S.R. which started in mid-September was terminated on 5 November 1952. The total number of trains with recruits is estimated at 76. Of these, 65 have definitely been confirmed, while 11 trains are only presumed to have been used. The return movement of discharges began in mid-October. Fifty-five trains with discharges were confirmed prior to 20 November. These and two other trains which probably were used, bring the total of shipments to 57. If each train had carried about 1,200 men, a conservative estimate, a total of about 91,000 recruits would have arrived in East Germany between mid-September and 5 November. About 60,400 discharges returned to the U.S.S.R. between mid-October and 20 November. However, it appears that the discharge program was not completed by that time, and therefore, the final estimates of the entire personnel exchange cannot yet be made.

SECRET

25X1

SECRET

25X1

Miscellaneous.

8. With a few exceptions, German workers employed with Soviet units in numerous military posts received a termination of employment notice in mid-November 1952. It is to be expected that those still employed will be discharged in the near future. This measure which was first reported in the summer of 1952 is another indication that the Russians are attempting to increase the security of their installations.

Transportation.

9. The traffic situation eased in November when Soviet demands on railroad transportation space were reduced to normal upon completion of the maneuvers.
10. Coal stocks decreased further. On 11 November 1952, it was established that a day's requirement was 20,100 tons, and based on this the coal stocks on 12 November totaled 9.5 days' requirements; this amount is considered insufficient for winter conditions. No indications that an unusually large coal reserve would be established by the end of 1952 were discernible in November. The stockpiling of any large reserve was possibly delayed by a shortage of gondola cars which are currently needed for seasonal crop shipments such as potato and sugar beet shipments.
11. Traffic through stations on the Oder-Neisse line continued at a normal rate. Traffic on the second track of the Oder River bridge of the FRANKFURT/Oder crossing station was blocked on 2 and 3 November 1952 because of reconstruction work. Most of the traffic was detoured via KUESTLIN and some trains via GUBEN. Special transportation operations under way included:
 - a. Return from the U.S.S.R. of former German freight cars.
 - b. The grain import program which is also called grain shuttle-train program.
12. Railroad construction projects
 - a. The new single-track section on the KAROW-BIEKOW-WUNDER line of the Nordring BERLIN was completed and was opened five weeks behind schedule on 11 November 1952. It has a speed limit.
 - b. The second track on the Oder River bridge near FRANKFURT/Oder was completed at the beginning of November. It is expected that ~~double-track~~ operations via this most important crossing point for Soviet transit traffic will be opened in early December.
 - c. The completion for the reconstruction of the second track of the Oder River bridge near KUESTLIN had to be postponed until May 1953 because of a shortage of construction materials.
 - d. The reconstruction of the single-track Oder River bridge near ZANKOWITZ-ALT FURCHTIZ as well as the single-track bridge across the Neisse River near HUSKAU were subsequently entered on the 1953 building program of the East German Railroads. As there are no economic reasons to justify this project which is financially expensive and will require scarce materials, it is believed that the Russians have ordered the reconstruction of the two bridges for strategic reasons.

SECRET

25X1

SECRET

25X1

- e. Except for the bridge across the Schwarze Elster River near BIEBERWITZ which is still single-track, the FALKENBERG-DECKLUGK-KIRCHHAIN double-track section was open for operation on 4 October 1952.
- f. The RUMLAND-ELSTERWERDA section was opened for double-track operation on 7 November 1952.

Miscellaneous Railroad Information.

- 13. a. The stock of heavy-duty railroad cars was increased by about 300 new type RRYm heavy-duty cars from factories in East Germany. These 6-axle, 90-ton cars have a usable length of 14 to 16 meters and are capable of carrying two heavy tanks. These cars are increasingly used for Soviet tank shipments inside and outside East Germany.
- b. An East German railroad car model, the wheel gauge of which could be switched from standard gauge to Soviet gauge, was demonstrated at the 1952 LEIPZIG autumn fair. The wheels remain on the axle but revolve on a section provided with slide rail and guide rail, and can be adjusted to the required gauge. This method was first developed in Czechoslovakia and is considerably more time-saving than the previous method.

Supply.

- 14. Military supply traffic from the U.S.S.R., which had been greatly in excess of the average since March 1952, decreased for the first time in September. So far, as can be determined, the rate of incoming shipments from the U.S.S.R. also decreased in October. Although the final figures for October 1952 are not known, the volume of incoming military supply shipments is far below the normal rate of 1,000 carloads per month for the first time. [redacted] the rate of incoming supply continued to decrease. This decrease is primarily due to the completion in October 1952 of the motor vehicle exchange program. As about 11,000 new motor vehicles arrived from, and about 9,000 old motor vehicles were returned to, the U.S.S.R., the stock of motor vehicles of Soviet units in East Germany has increased from about 50,000 vehicles to 52,000. As this number includes about 20 percent new vehicles of uniform type, the motorization of the units and combat readiness is considerably improved. The small volume of incoming ammunition shipments is still noteworthy. Previous assumptions that large ammunition shipments would arrive to replenish ammunition stocks after the summer maneuvers were proven false. Even if the installations in East Germany were well-stocked with ammunition, this would not account for the low volume of incoming ammunition shipments. It is believed, therefore, that the rate of incoming ammunition will rise during the winter months. [redacted]

25X1

25X1

25X1

[redacted] In October, supply traffic inside East Germany was at a higher level than usual, due to the completion of the fall maneuvers and the resultant shipments back to the military posts.

General Information on Supply Installations.

- 15. a. The assumed transfer from MAGDEBURG to KÖNIGSBORN of the army supply depot of the Third Shock Army [redacted] was confirmed. 25X1
- b. The army postal office of the Third Shock Army [redacted] is stationed in MAGDEBURG. 25X1

25X1

SECRET

25X1

German Volkspolizei.16. Armeegruppe Nord.

The divisions in PIRMA and PRENZLAU have the T/O of Soviet motorized rifle divisions and the division in EGGESIN the T/O of a mechanized division. The barracks installations in the TORGELOW-EGGESIN-ALTALP area were not completed in time, so several units of the divisions in PRENZLAU and EGGESIN had to be transferred from tent camps into winterized quarters in other KVP posts. This measure resulted in a dispersion of some of the elements of the Armeegruppe Nord which had just been activated. Units transferred during the period from 23 to 26 November 1952 included:

- a. The 3d Inf Regt from the TORGELOW-LROGGEWIDE area to LOEDAU.
- b. The 1st Arty Regt of the division in PRENZLAU from the TORGELOW-STALLBERG area to KILCHOWESSE near BRANDENBURG.
- c. An artillery regiment of the division in PRENZLAU from the TORGELOW-STALLBERG area to DESSAU-KOCHETZ.
- d. An engineer battalion of the division PRENZLAU from the TORGELOW-STALLBERG area to BRANDENBURG-HOFENSTUCKEN.
- e. Other elements of the division in PRENZLAU from the TORGELOW area to PIKOW which is the post of the 1st Inf Regt of the division.
- f. The 1st Mecz Regt of the division in EGGESIN from Camp KARPIN to SCHLACHEN-STERNBUCHHOLZ.
- g. The 2d Mecz Regt of the division in EGGESIN from Camp KARPIN to PRERITZ, into the quarters vacated by the Soviet 25th RL Brig.
- h. An engineer battalion of the division in EGGESIN to FUSCHEN near NEUBRANDENBURG.

These units constitute about 50 percent of the VP personnel stationed in the PIRMA-PIRENZLAU-TORGELOW-EGGESIN area. The units that remained were still quartered in tents in mid-November. They are scheduled to move into brick buildings which had not received a coat of stucco at the beginning of December. Five large building sites have been observed in the TORGELOW-EGGESIN area, namely: one near STALLBERG in the Viereck Forest southeast of TORGELOW; one southwest of the LROGGEWIDE forester's house along the TORGELOW-STALLBERG road; one just east of SPACHTBERG northeast of TORGELOW; one 2 km southeast of EGGESIN along the road to KARPIN; and one west of ALTALP near the WALBIN forester's house. It is expected that the units which have been transferred to winter quarters will return to their areas of activation upon completion of the barracks installations.

New Posts and Offices.

17. Locations confirmed as being occupied by KVP include: the castle in ORANIBURG; the former Grenadier Kaserne in SCHLACHEN; installations in PRERITZ; and NIEDERSCHLAG near ANSANG in the area south of CHEMNITZ. It is undetermined which KVP units are stationed in these towns, except for PRERITZ which quarters the 2d Mecz Regt of the division in EGGESIN.

A new KVP supply depot, which has delivered billeting equipment to some units, is located in MITTELWALDE south of BERLIN. A so-called Territoriale Verwaltung (TV) (territorial administration), which is presumably equivalent to a former military area headquarters, is being established

SECRET

10

25X1

in DUISBURG. A so-called Zentrale Werbekommission (ZWK) (Central Recruiting Commission) which performs the functions of a former recruiting district headquarters is being established in DUISBURG. Registration and induction of "volunteers" for the "People's Army" are among the functions of this new office. It is expected that similar offices will be established in all administrative seats of the new Verwaltungsbezirke.

Training.

18. An uninterrupted period of training (in favorable quarters was the reason for transferring a large contingent of the units from the TORTELON-BOGESSIN area into winter quarters. The units of the division are widely dispersed in order to find proper quarters so that basic training, under the supervision of Soviet instructors assigned to the units in October, could be conducted on a uniform level. The 2d Mecz Regt in PUSCHITZ of the division in BOGESSIN was assigned 38 Soviet instructors who held officer rank. Based on this figure, it is assumed that each division of the Armeegruppe Nord is assigned about 200 Soviet instructors.

About 400 junior lieutenants, who had been recently promoted, finished their course at the Infanterie Offiziers Schule in LAUBURG earlier than scheduled and were reassigned to posts at the beginning of October. Of these, 165 were reassigned to PUSCHITZ, i.e. in the area of the Armeegruppe Nord. It was said that an additional 400 trained junior lieutenants from the LAUBURG school were to be reassigned to the troops in December.

Personnel.

19. The recruiting campaign for the WP continues. The KVP is being brought up to strength with personnel of the younger classes from the NVDVP, regardless of the gaps thus caused within the NVDVP. It has been observed that most KVPs continuously induct new personnel.

Conclusion.

20. The fact that the installations in the area of the Armeegruppe Nord were not completed in time is an obvious failure in planning and organization and is characteristic of the haste with which the establishment of the National Force has been carried out since July 1952. Numerous major and minor changes which occurred in rapid succession in the organization, especially on the top echelon, as well as curtailing of training periods at the ordnance schools and other measures are indicative of heavy Soviet pressure to expedite the militarization of East Germany. The government of the LLR and its military leaders have been unable to keep pace with Soviet demands. It is obvious that it is planned to have at least three full divisions ready for at least limited service in the summer of 1953. The filling up of the about 20 cadre units still in existence and the establishment of the TVW is progressing at a normal rate.
